

## Dyes for Bioconjugation Publications

- Shao F, Yuan H, Josephson L, Weissleder R, Hilderbrand SA. 2011. *Facile synthesis of monofunctional pentamethine carbocyanine fluorophores*. **Dyes and Pigments**, 90, 119-122.
- Wang L, Fan J, Qiao X, Peng X, Dai P, Wang B, Sun S, Zhang L, Zhang Y. 2010. *Novel asymmetric Cy5 dyes: Synthesis, photostabilities and high sensitivity in protein fluorescence labeling*. **J Photochem. & Photobiol A: Chemistry** 210, 168-172.
- Sho F, Weisseleder R, Hilderbrand SA. 2008. *Monofunctional carbocyanine Dyes for Bio and Bioorthogonal Conjugation*. **Bioconj. Chem.** 19, 2487-2491.
- Bouteiller C et al. 2007. *Novel Water Soluble Near-Infrared Cyanine Dyes: Synthesis, Spectral Properties, and Use in the Preparation of Internally Quenched Fluorescent Probes*. **Bioconjugate Chemistry** 18 (4), 1303-1317.
- Ye et al. 2005. *Multivalent Carbocyanine Molecular Probes: Synthesis and Applications*. **Bioconjugate Chemistry** 16(1), 51-61.
- Hilderbrand SA et al. 2005. *Monofunctional Near-Infrared Fluorochromes for Imaging Applications*. **Bioconjugate Chemistry** 16 (5), 1275-1281.
- Pham W et al. 2005. *Synthesis and Applications of a Water Soluble Near Infrared Dye for Cancer Detection Using Optical Imaging*. **Bioconjugate Chemistry** 16 (3), 735-740.
